

HOW TO GET STARTED

Access to our services is easy.

Any physician may order therapy services.

A prescription for Physical, Occupational, or Speech therapy requesting an evaluation and treatment should also include: the diagnosis, the patient contact information, as well as the insurance information will also be required.

After our Rehabilitation office intake associate verifies the information, you will be contacted and an appointment for therapy will be made.

Phone: (360) 652-2632 | Fax: (360) 652-2633

Located on the Puget Sound and proudly serving Skagit County and Snohomish County and the communities of Stanwood, Camano Island, Arlington, and Mt. Vernon.

ABOUT US

Warm Beach Rehabilitation offers the highest level of care for those individuals recovering from conditions that affect their daily lives. We provide comprehensive outpatient therapeutic services.

We believe there are intangibles at work as well. Being faith-based, our Rehabilitation Outpatient Services at Warm Beach Post-Acute Care Center also focuses on caring for the spirit, confident that it has positive effects on the body.

Our dedication to Warm Beach Senior Community ministry, combined with our commitment to service excellence in the delivery of comprehensive rehabilitation services, provides an optimal setting for recovery.

OUR STAFF

Physical Therapists

Our Physical Therapy team offers one-on-one therapy consisting of the traditional gait analysis and training, strengthening, pain management, and restoration of flexibility and function. In addition, we have a wide range of specialized therapeutic technologies to treat more complex conditions, decrease muscle disuse atrophy, enhance soft tissue healing with increased circulation and improve neuromuscular control in patients with orthopedic and neurological diagnoses. Some of our tools are: Omnistim FX-2, OmniSound 3000, Omnicycle Elite, Megapulse II, and an OmnistandVR.

Occupational Therapists

Our Occupational Therapy team offers the traditional rehabilitation model, functional assessment and training, neuro-developmental techniques, that can help with activities of daily living. Learn to use adaptive equipment and assistive devices. Receive endurance and strength training and learn energy conservation and joint protection techniques.

Speech Therapists

Our Speech-Language Therapy team offers a variety of services and applies principles, methods, and procedures of evaluation, consultation, intervention, and instruction related to speech, language, cognition, and swallowing. With achievable goals in mind, it is our mission to improve and preserve a resident's independence through a customized plan. All our therapeutic activities focus on energizing and strengthening residents to improve their performance.

OUR PATIENTS

We treat patients for a wide range of diagnoses including:

- Orthopedic Conditions
- Neurological Conditions
- Vestibular and Balance Conditions
- Musculoskeletal Conditions
- Upper Extremity Limitations
- Speech Disorders
- Language Disorders
- Voice Disorders
- Swallowing Disorders
- Cognitive Skills
- Fall Risk Assessment & Prevention
